Product: MiSMo A-C-E Vitamin Serum

Description: This is a concentrated anti-ageing treatment which exotically and precisely combines Vitamin C, an anti-oxidant which helps stimulate the production of collagen, with Vitamins A and E to effectively combat the signs of sun damage. Benefits of A-C-E Vitamin Serum include: Firmed, toned and radiant looking skin, Increase collagen production for smoother skin, Repairs and reduces UV provoked damage and protects against future harm, Combats free radicals which cause ageing, Moisturises all layers of the skin (Great saviour in the wind and cold), Refines pores and improves appearance.

A-C-E Vitamin Serum's most vigorous ingredient is Ascorbyl Tetraisopalmitate, an extremely effective, reliable form of Vitamin C. Ascorbyl Tetraisopalmitate brightens, softens and evens skin tone while increasing elasticity and reducing pigmentations to promote revitalisation and generate a youthful, glowing appearance.

Featuring a fantastic, complementary blend of Vitamins A and E, MiSMo's A-C-E Vitamin Serum effectively supplies the skin with energy to fight the signs of sun damage. This fabulous, technologically advanced serum absorbs quickly and powerfully into the skin eliminating any greasy and slippery sensation often experienced with such therapy. .

REVIEWS BY REAL WOMEN JUST LIKE YOU!

Personally I love serums and oils on my skin and this was no exception. The serum glides on the skin very smoothly and keeps it well moisturised. I noticed an immediate improvement in my skin's hydration. The vitamins in the serum do give the skin a nice brightness. Overall I enjoyed using this serum and will keep using it coming into summer to reduce the UV damage the sun can do.

Product: MiSMo A-C-E Vitamin Serum

Nichole

I thought it was great how it didn't make my skin all greasy and really shiny. The company's claim that it absorbs quickly is actually true. It felt really nice on my skin. The serum was a nice texture that made it absorb quickly into the skin. There was only a slight, not over-powering pleasant smell to the product. My face was nice and moisturised in the morning, and my skin was really soft. I like how it came with a dropper to help application, it made things a lot neater and easier to apply. It was good that it didn't drip everywhere.

Lesley

I was pleased to note that this serum is not as oily as I thought it might be and it soaked into my skin nicely. I like a dropper. At least I'll get to use all of the contents eventually. It's very economical. I felt it gave my skin a much needed boost.

Brigitta

This serum was slightly oily when first applied but I didn't mind this at all. It felt smooth going on the skin and I noticed that my skin felt nicely hydrated in the morning. I will keep using it as I think that in the long run I will notice more benefits on my skin. The smell is very slight which is nice for a product that you apply at night. I liked using this serum.

Rosa

I found this serum to have a greasy feel leaving my face very shiny. Does not absorb into the skin very well so my face remains shiny and oily looking. Definitely best suited for night time wear, and you would be hard pressed to use it under your normal moisturiser. However felt pleasant on the skin. The smell is mild and pleasing. Only need a small amount to cover the whole face so should get plenty of applications from one bottle. My skin appeared well hydrated. Have not been using the product for long enough to see any longer term benefits as yet. May see better effects with time.

Personal Rating: ★★★★★

Rachel

My first impression was that the Serum was absorbed quickly into my skin. The application was great in that it went on feeling light and absorbed quickly. It didn't feel like I was putting anything heavy on my skin. Both the texture and the smell were pleasant. It was nice to have a treatment that didn't leave me feeling greasy. I think I would definitely try it longer term as I am getting older and it would be beneficial to add this type of treatment to my skin. 3 out of 5 Stars....it feels good going into my skin but I would like to see the long term benefits before giving it a higher rating.
